ayesha20021210@gmail.com | [+94 77 061 4999](tel:+94770614999) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Bandaragama, Sri Lanka.

PROFILE

Versatile **IT undergraduate (3rd year, SLIIT)** with hands-on experience across the full software delivery cycle — **full-stack development** (Java, PHP, JavaScript, MERN stack, Spring Boot), **Agile project coordination** (task breakdown, Kanban tracking, stakeholder communication), and **software testing/QA** (manual and automated testing with Playwright and Cypress).

Comfortable owning a feature end-to-end — from planning and coding to testing and delivery — in Agile teams using Git/GitHub. Builds, breaks, and coordinates software with equal confidence.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT), Malabe

BSc (Hons) in Information Technology, Specializing in Information Technology | **Oct 2023 – Present**

RELEVANT COURSEWORK

- Object-Oriented Programming
- Data Structures and Algorithms
- Database Management Systems
- Software Frameworks & Web Development
- Mobile Application Development
- IT Project Management
- Software Testing & Quality Assurance

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, PHP, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot

Mobile Development: Android Studio (Kotlin & XML UI design)

Testing & QA: Manual & Negative Testing, Unit Testing, E2E Testing (Playwright, Cypress), Bug Reporting

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Eclipse, Postman, Excel

Other: MVC Architecture, REST APIs, Agile Methodology, SDLC/STLC, Task Breakdown & Kanban Management

SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Communication
- Adaptability
- Time Management
- Attention to Detail
- Critical Thinking
- Leadership & Stakeholder Management

PROJECTS

Web Projects

UniSpectra - Group Project

Jan 2026 – Jun 2026 | React.js, Spring Boot, MySQL, Cypress | [GitHub Repository](#)

A multi-module university platform built with a React frontend and a Spring Boot backend.

My Contribution (Assignment Management Module):

- Built the Assignment Workflow module — assignment/task creation, task breakdown, and a Kanban-style tracking board — including planning the workflow structure and coordinating scope with teammates.
- Developed a Research Assistant feature offering AI-assisted topic and resource suggestions for assignments.
- Connected the React frontend to Spring Boot REST endpoints, and validated the module with unit tests and Cypress E2E tests covering task creation through to Kanban board updates.

Smart Campus Hub - Group Project

Jan 2026 – Jun 2026 | React, TypeScript, Spring Boot, MySQL, Postman | [GitHub Repository](#)

A next-generation university ecosystem for facility management, AI-driven maintenance ticketing, and seamless student-staff operations.

My Contribution (Facility & Asset Management Module):

- Led planning and delivery of the Facility & Asset Management module: a smart catalog for browsing lecture halls, labs, and sports facilities with real-time availability.
- Implemented facility categorization by type (Study, Lab, Sport, Event) with capacity and equipment details, and added a Favorites & Quick-Access feature for rapid booking.
- Performed unit testing and verified API endpoints using Postman to confirm request/response correctness.

QA / Testing Highlight

Singlish-to-English Translation System - Test Automation Assignment | Python, Playwright, Excel | [GitHub Repository](#)

- Authored 50 negative test cases covering edge cases, invalid inputs, and boundary conditions; documented test cases and results in Excel following a structured test plan.
- Automated test execution using Playwright to validate system behavior against expected outcomes.

Mobile Application Projects

QuickBus - Individual Project

Kotlin, XML, Android Studio | [GitHub Repository](#)

- Independently planned and delivered the full user journey — onboarding, authentication, route search, schedule viewing, seat booking, and payment confirmation — from requirements to release.
- Implemented user authentication, profile management, a bottom-navigation UI, a 4-step onboarding flow, and a booking-status notifications feature.

TaskFlow - Individual Project

Kotlin, Android Studio, MPAndroidChart | [GitHub Repository](#)

- Built a personal productivity app combining habit, mood, and hydration tracking with a tabbed dashboard (Habits, Mood, Hydration, Summary).
- Implemented a habit progress graph (MPAndroidChart) and a home-screen widget with Alarm Manager-based reminders, using local-first data storage (SharedPreferences, JSON-serialized).
