Bandaragama, Sri Lanka.

PROFILE

Motivated **Full Stack Developer** and 3rd-year IT undergraduate at SLIIT, with hands-on project experience across **Java, PHP, and JavaScript**, including full-stack development with the **MERN stack** and **Spring Boot**. Comfortable working across the stack, from React front-ends to backend REST APIs and database design.

Experience spans academic group projects and individual Android app development. Strong understanding of **object-oriented programming**, **MVC architecture**, and **database management**, with experience collaborating in Agile teams using Git/GitHub. Seeking a **Full Stack Developer Internship** to apply this knowledge in a real-world setting.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT), Malabe

BSc (Hons) in Information Technology, Specializing in Information Technology | **Oct 2023 – Present**

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, PHP, SQL
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Spring Boot
- **Backend Development:** Java Servlets & JSP, Spring Boot, RESTful APIs
- **Mobile Development:** Android Studio (Kotlin & XML UI design)
- **Web Development:** HTML5, CSS3, PHP, Bootstrap, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, VS Code, Eclipse, Postman
- **Other:** MVC Architecture, REST APIs, Agile Methodology

SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Communication
- Adaptability
- Time Management
- Attention to Detail
- Critical Thinking

PROJECTS

Web Projects

UniSpectra — Group Project | Jan 2026 – Jun 2026 | React.js, Spring Boot, MySQL | [GitHub Repository](#)

A multi-module university platform built with a React frontend and a Spring Boot backend.

My Contribution (Assignment Management Module):

- Built the Assignment Workflow module, including assignment/task creation, task breakdown, and a Kanban-style tracking board.
- Developed a Research Assistant feature offering AI-assisted topic and resource suggestions for assignments.
- Connected the React frontend to Spring Boot REST endpoints for data persistence.

Smart Campus Hub — Group Project | Jan 2026 – Jun 2026 | React, TypeScript, Spring Boot, MySQL | [GitHub Repository](#)

A next-generation university ecosystem for facility management, AI-driven maintenance ticketing, and seamless student-staff operations.

My Contribution (Facility & Asset Management Module):

- Built the Facility & Asset Management module: a smart catalog for browsing lecture halls, labs, and sports facilities with real-time availability.
- Implemented facility categorization by type (Study, Lab, Sport, Event) with capacity and equipment details.
- Added a Favorites & Quick-Access feature for saving frequently used rooms for rapid booking.

Mobile Application Projects

QuickBus

Individual Project | Kotlin, XML, Android Studio | [GitHub Repository](#)

An Android mobile application that allows users to search bus routes, view schedules, book seats, and make payments — all from their smartphone.

- Built end-to-end user flow: onboarding, authentication, route search, schedule viewing, seat booking, and payment confirmation.
- Implemented user authentication, profile management, and a bottom-navigation UI using XML layouts and Material Design.
- Designed a 4-step onboarding experience and added a notifications feature to keep users updated on booking status.

TaskFlow

Individual Project | Kotlin, Android Studio, MPAndroidChart | [GitHub Repository](#)

A personal productivity app that combines habit tracking, mood logging, hydration monitoring, and progress visualization into a single dashboard, with home-screen widget support and scheduled reminders.

- Built habit, mood, and hydration tracking features with a tabbed dashboard (Habits, Mood, Hydration, Summary).
- Implemented a habit progress graph using MPAndroidChart and a home-screen widget with Alarm Manager-based reminders.
- Used Android SharedPreferences (JSON-serialized) for local data persistence across habits and mood entries.

RELEVANT COURSEWORK

- Object-Oriented Programming
- Data Structures and Algorithms
- Database Management Systems
- Software Frameworks & Web Development
- Mobile Application Development
- IT Project Management
